Dataset	diabetes.csv
Date	2026-07-28 20:22
Selected Model	SVM
Dataset Health Score	99.7/100
Target Column	Outcome
Task Type	Classification

Dataset Overview

Rows	768
Columns	9
Duplicate Rows	0
Total Missing Cells	0

AI Recommendations

- Apply StandardScaler or RobustScaler to numeric features.

Model Performance / Leaderboard

Model	Training_Time_sec	Accuracy	Precision	Recall	F1	ROC_AUC
SVM	0.326	0.7662	0.7613	0.7662	0.7586	0.8118
Logistic Regression	0.366	0.7597	0.7608	0.7597	0.7602	0.8187
Decision Tree	0.022	0.7338	0.74	0.7338	0.7361	0.7202

Best Model: SVM

— Model: SVM

— Training_Time_sec: 0.326

— Accuracy: 0.7662

— Precision: 0.7613

— Recall: 0.7662

— F1: 0.7586

— ROC_AUC: 0.8118

Final Conclusion

The dataset 'diabetes.csv' contains 768 rows and 9 columns, with an overall health score of 99.7/100. Overall data quality is strong, with limited missing values, duplicates, or structural issues. For this classification task, 'SVM' was selected as the best-performing model on the held-out test set. Key metrics: Model: SVM, Training_Time_sec: 0.326, Accuracy: 0.7662, Precision: 0.7613, Recall: 0.7662, F1: 0.7586, ROC_AUC: 0.8118. Limitations: results are based on a single train/test split and default hyperparameters unless tuning was applied; performance may vary with more data, feature engineering, or cross-validation. For production deployment, monitor for data drift and retrain periodically.
